

Use Task Scheduler to schedule a shutdown

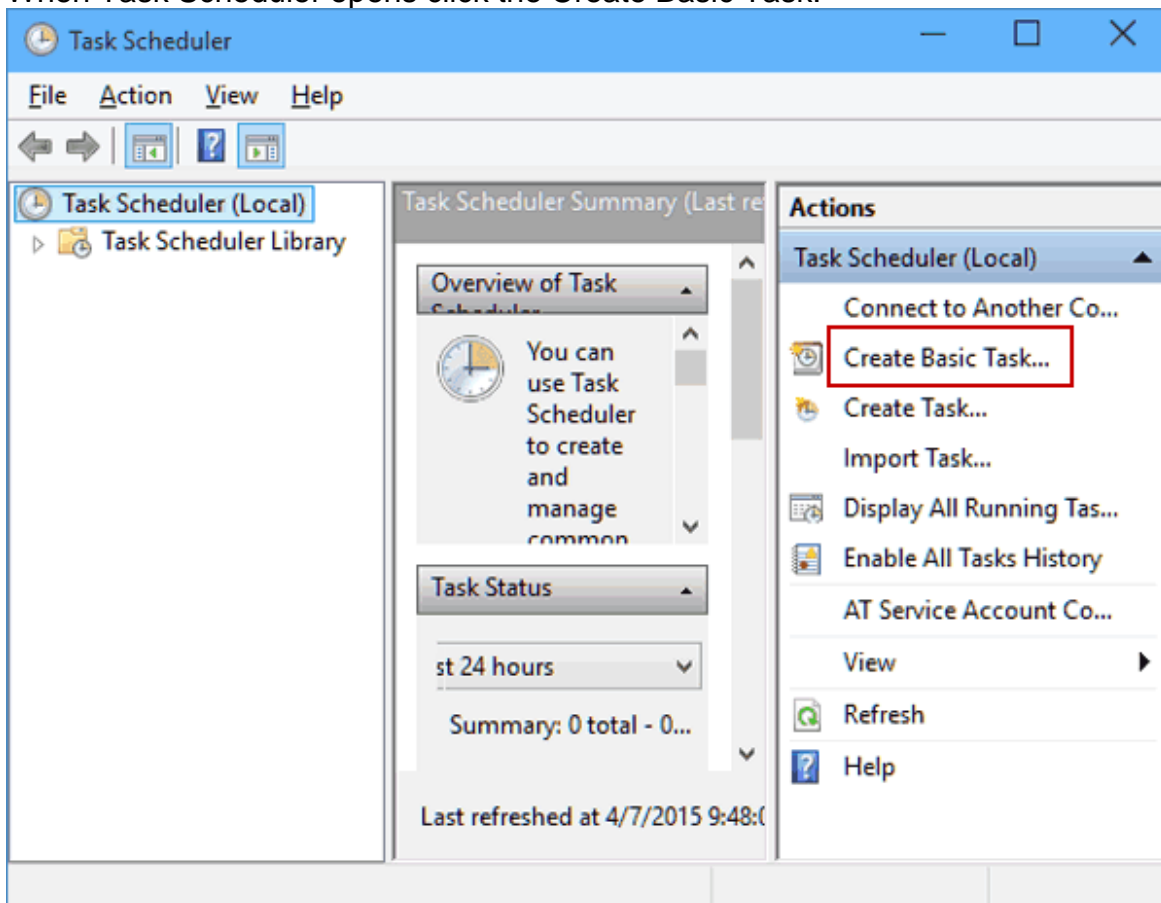

Using a connected USB keyboard and mouse to the Pro V4, “**Esc**” out of the signage software to access the Connection Status Screen.

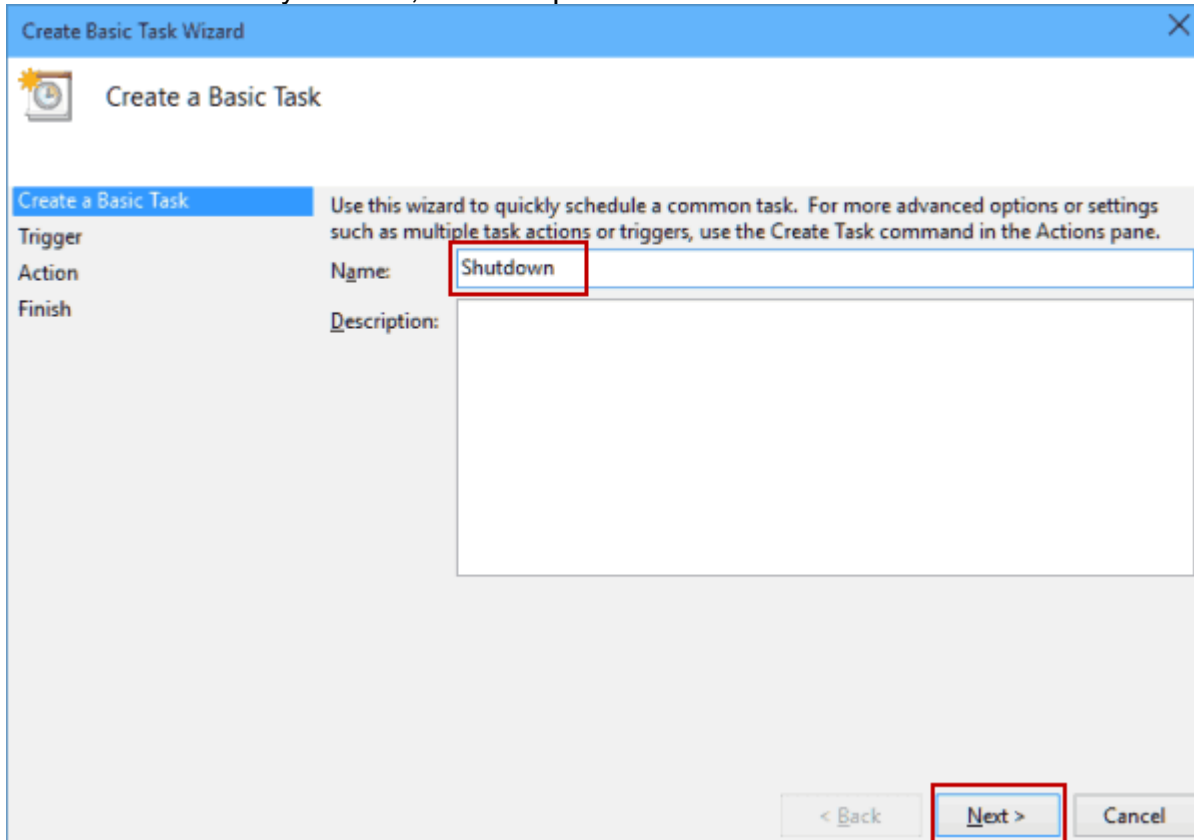

Then click on the **Settings** cog in the top right and click “**Exit**”

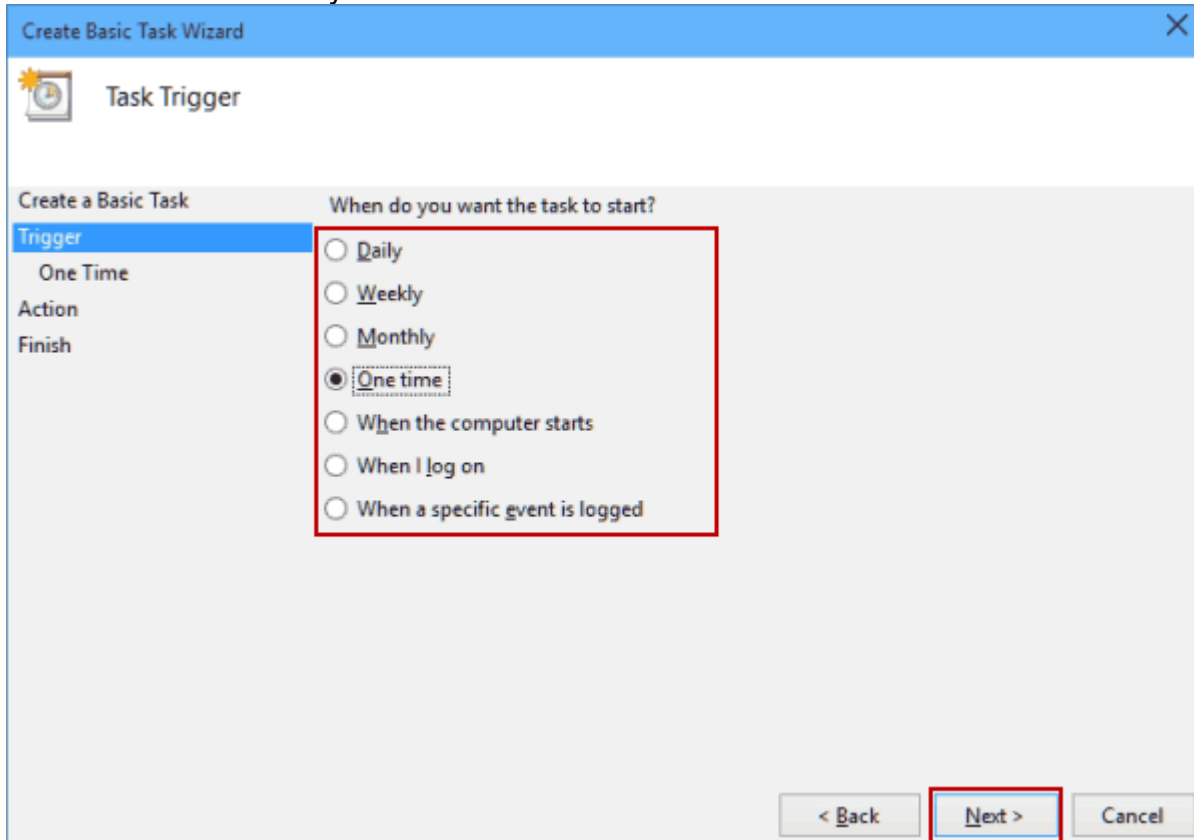

1. Start Task Scheduler. You can start it by going to the Start Menu typing schedule in the Search bar and choosing Schedule tasks.
2. When Task Scheduler opens click the Create Basic Task.

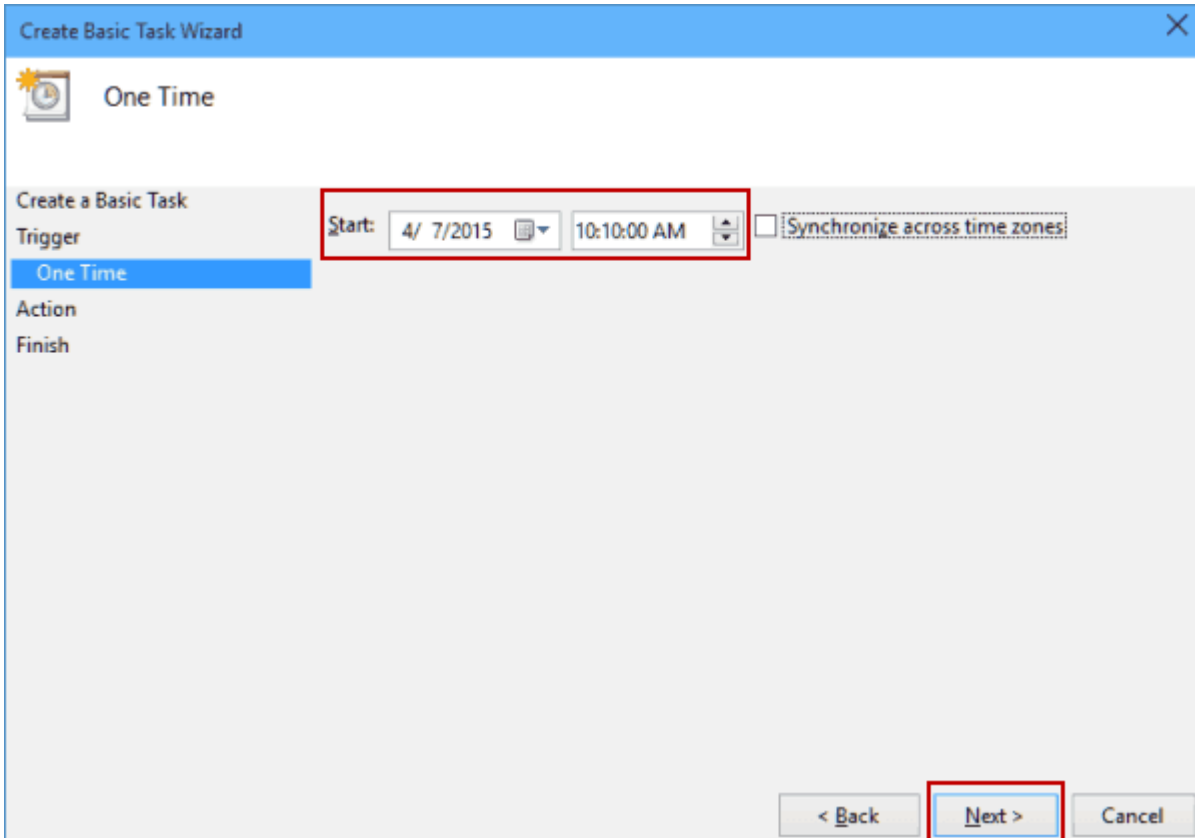

3. Enter the name for your task, for example Shutdown.

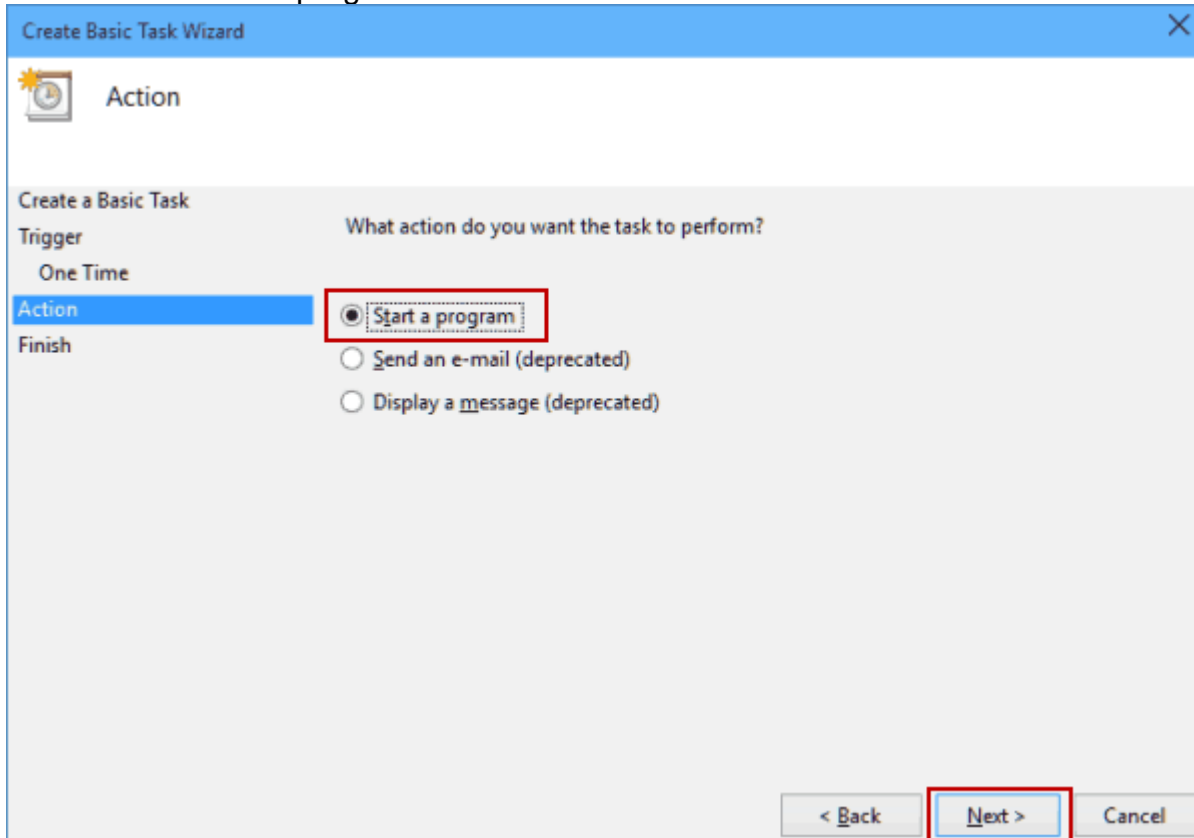

4. Now choose When do you want the task to start. In our case we'll choose One time.

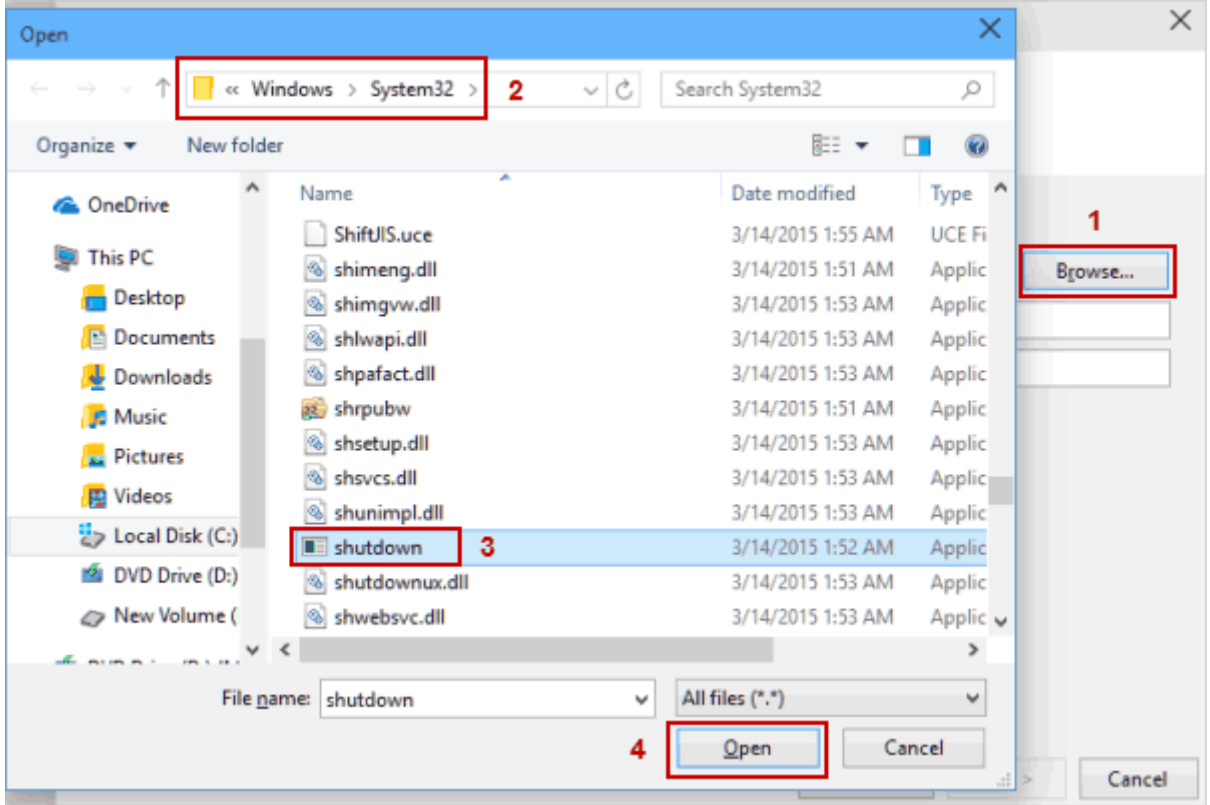

5. Now enter the time and date when the task will be executed.

6. Next choose Start a program.

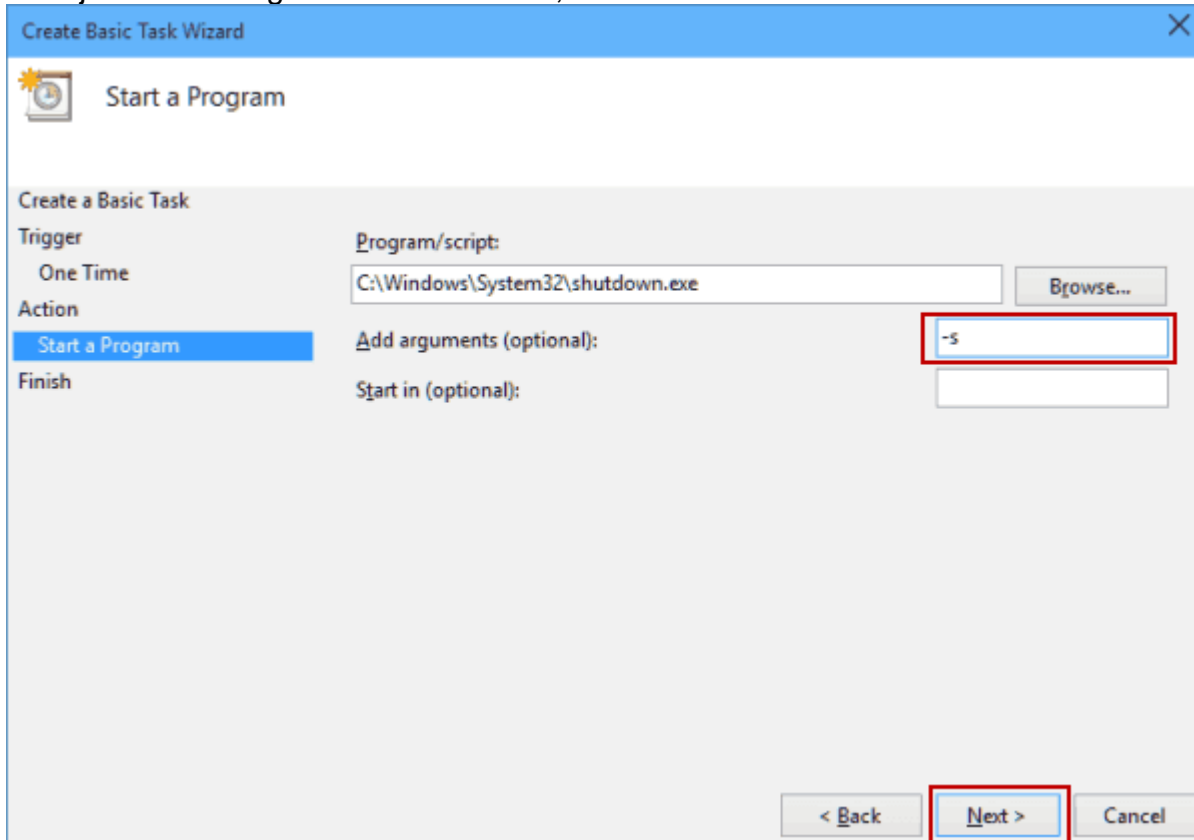

7. Click the Browse button and go to C:WindowsSystem32 and select a file called shutdown. Then

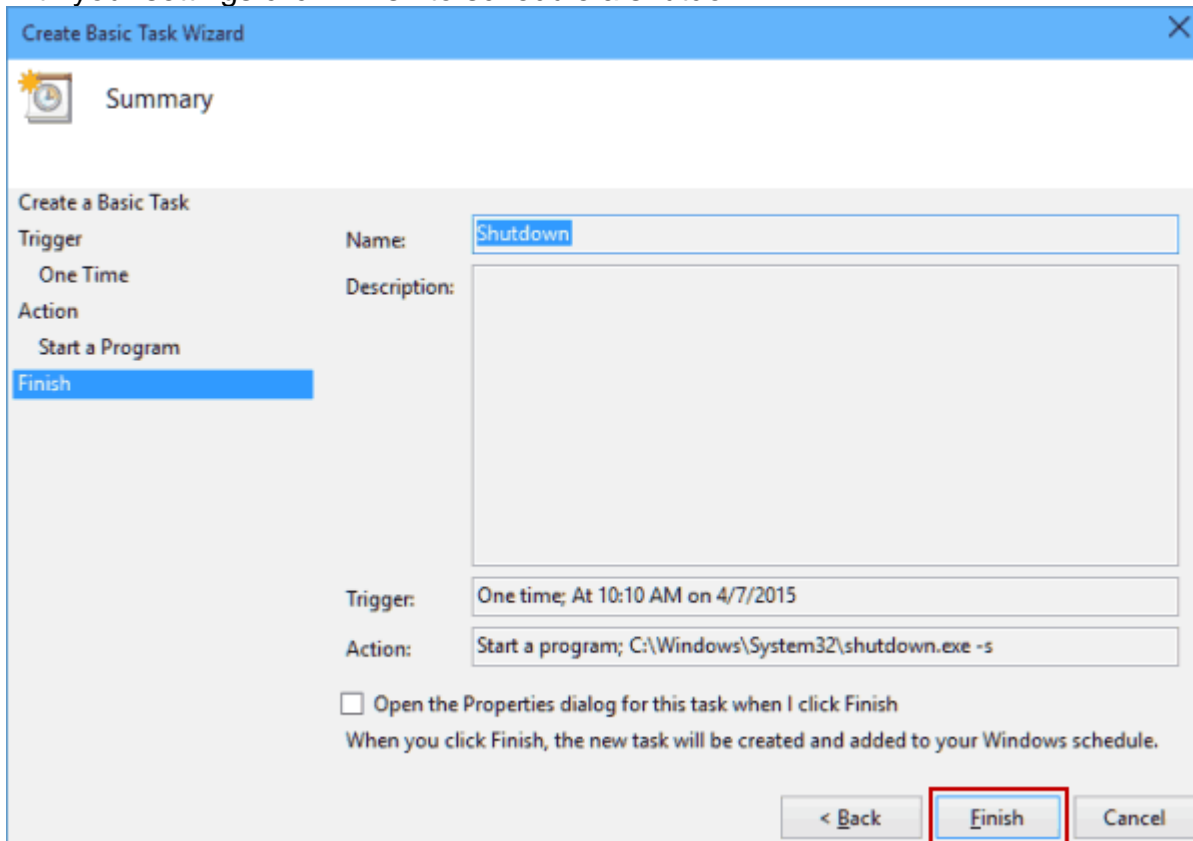

click Open.

8. Now just in Add arguments field add -s, and then click Next.

9. Now you should see the task information. You can check it one last time, and if you're pleased with your settings click Finish to schedule a shutdown.

The screenshot shows the 'Create Basic Task Wizard' dialog box in Windows, specifically the 'Summary' step. The window title is 'Create Basic Task Wizard' with a close button (X) in the top right corner. The 'Summary' step is indicated by a sun icon and the text 'Summary'. On the left side, there is a vertical list of steps: 'Trigger', 'One Time', 'Action', 'Start a Program', and 'Finish'. The 'Finish' step is highlighted with a blue background. The main area of the dialog contains the following information:

- Name:** Shutdown
- Description:** (Empty text box)
- Trigger:** One time; At 10:10 AM on 4/7/2015
- Action:** Start a program; C:\Windows\System32\shutdown.exe -s

At the bottom, there is a checkbox labeled 'Open the Properties dialog for this task when I click Finish' which is currently unchecked. Below the checkbox is the text: 'When you click Finish, the new task will be created and added to your Windows schedule.' At the bottom right, there are three buttons: '< Back', 'Finish' (which is highlighted with a red border), and 'Cancel'.
